

SKIP BIRD

The Science Nerd

Invite Skip to Speak at Your Upcoming Conference, Retreat or Online Event

Skip Bird is a funny, dynamic speaker whose talks are entertaining, engaging, and educational. Skip's speeches and workshops are hands-on, interactive, and informative; designed to help inspire participants to explore science on their own. The topics below (and a few more) can be delivered as a keynote, conference breakout session, educational or non-profit training, assembly or webinar. Additional topics can be customized at your request.

PRESENTATIONS

NASA Heliophysics Ambassador:

In-depth learning focused on Earth, Space, and Physical Science for educators working with informal audiences and formal K12 educators.

Chicken Little Was Right: The Sky Is Falling

Explore comets, asteroids, dinosaurs, and upcoming meteor showers. Telescope use dependent on clear sky weather.

Astronomy From The Ground Up:

Discussion and activities.

Accessibility:

For vision and mobility impaired.

Black Holes - No Escape:

Warp the fabric of space and survive to tell about it.

Phun with Physics:

Strange examples of physics gone wrong.

We have had a great response from troop leaders, many saying that this year's activities were the most engaging they can remember in recent years.

*~ J. R., Girls Scouts of America,
Program Events Specialist*

Thanks for everything. As always our participants enjoyed your presentation.

~ N. W., National Multiple Sclerosis Society

Book Skip For Your Next Event skip@skipbirdthesciencenerd.com

Skip has spoken at many events with a diverse client list and to all age groups, including: NASA Goddard, National Air and Space Museum, U.S. Department of Energy, Towson University, Rockville Science Center, Boy Scouts, Girls Scouts and many more.

His passion for science outreach lead him to develop and present accessibility programs to the National Federation for the Blind and the National Multiple Sclerosis Society.

When you book Skip as a speaker, your group will be inspired and equipped to continue exploring the sciences after even after they leave your event. He is committed to outreach, as his Las Cumbres Award confirms, as well as serving your audience.
